

SAGE MAS 90 SAGE MAS 200

DIRECT DEPOSIT EXTENDED SOLUTION

CONVENIENT AND SECURE

Offer the convenience and security of Direct Deposit to your employees while eliminating the costs and risks associated with printing and delivering checks.

Direct deposit is the safe, easy way for your employees to have their paychecks deposited into their checking or savings accounts. By adding the Direct Deposit Extended Solution to your Sage MAS 90 or Sage MAS 200 ERP payroll system, you can improve employee satisfaction and eliminate the hassle of having to make special arrangements when a staff member is on vacation or sick.

Direct Deposit for Sage MAS 90 and 200 processes employee paychecks and automatically routes them to the specified financial institution—without printing a check. So instead of having to take the time to run to the bank themselves, your employees will see the money in their accounts on payday.

Best of all, this dynamic Extended Solution is easy to install and operate. It makes adding direct deposit functionality to your payroll software an affordable and convenient way “to make life simpler for your employees.” The software works by producing an Automated Clearing House (ACH) file. The ACH file is sent to your company’s financial institution. In turn, money is withdrawn and wired directly into the employee’s account. It’s as easy as that.

Sage MAS 90 and Sage MAS 200

Direct Deposit Extended Solution

"Sage MAS 90 has trimmed at least 25 percent off the time it takes to pay our people. It saves me from signing 90 checks every week."

Charlie Holzapfel
Treasurer
Krier & Blain, Inc.

BENEFITS

Direct Deposit offers you many advantages over checks, including:

Security

The direct deposit ACH files generated conform with National Automated Clearing House Association Standards (NACHA). The file can be transmitted electronically or by floppy disk. In addition, the software retains Direct Deposit data so batches can be regenerated at a later time. Plus, when you offer the service to your employees, you won't have to deal with the hassle of lost, stolen, and misplaced checks.

Reliability

Money is deposited on pay day and, for most financial institutions, immediately available to employees.

Flexibility

Direct Deposit supports multiple bank accounts by employee allowing you to deposit money into a checking or savings account. The output file that the solution generates is configurable based on the requirements of the financial institution. Employees can split disbursements between multiple accounts and institutions based on fixed dollar amounts or percentages.

Convenience

The biggest benefit for you and your employees is convenience. You can eliminate the time it takes to print and deliver paychecks. Your employees won't have to make any more of those special trips to cash their checks. It's especially beneficial during those times where they're on vacation or away on business.

For more advanced or specialized direct deposit needs, the Direct Deposit Extended Solution offers three companion solutions:

Multi-Company Combined

Enables you to combine multiple batches of direct deposit data through use of a Combined Direct Deposit File Generation utility.

Paperless Office: Direct Deposit Stubs

It still saves time, money, and printer wear and tear because it digitally archives employee direct deposit stubs. It also provides a stub viewer for your payroll department that gives easy access to view and retrieve these forms. The stub viewer can also be made available to employees as an "employee self service" option.

Enhanced Direct Deposit Stubs

Enables you to print direct deposit stubs for employees who are not leveraging the service. Use this solution in conjunction with Paperless Office Direct Deposit Stubs and Electronic Forms Delivery to send employee check stubs via email.
